

Video & Text Chat for E-Commerce

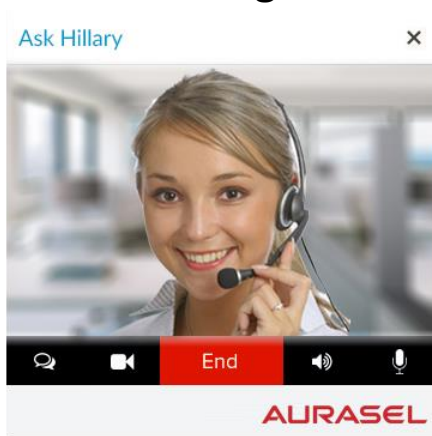

Visitors on your website often have questions regarding purchasing items. Sometimes, they have hesitations prior to purchasing, which only direct contact can remove.

A phone conversation is not a solution for them. Email can take time and slow down the purchasing process.

Aurasel is a solution for E-Commerce. Visitors on your website immediately start a text or video chat with your team, removing hesitations prior to making a purchase.

How it works:

1. Install Aurasel on your website (takes 2 minutes).
2. Start receiving calls

3. Monitor your website visitors and watch how they make multiple purchases in real-time.

In addition, if you advertise on the web, you receive information about the campaigns that bring results and the ones that do not.
